3. If we are unable to respond to the demands of our existing and new clients, or adapt to technological changes or advances, our business and growth could be adversely affected.

The financial services industry is characterized by increasingly complex and integrated infrastructure and services, new and changing business models and rapid technological and regulatory changes. Our clients’ needs and demands for our services evolve with these changes. Our future success will depend, in part, on our ability to respond to our clients’ demands for new services, capabilities and technologies on a timely and cost-effective basis. We also need to adapt to technological advancements and keep pace with changing regulatory standards to address our clients’ increasingly sophisticated requirements. Transitioning to these new technologies may be disruptive to our resources and the services we provide and may increase our reliance on third-party service providers. If we fail to adapt or keep pace with new technologies in a timely manner, provide customers with better services and user experience, or retain and attract skilled technology staff, it could harm our ability to compete, decrease the value of our services to our clients, and adversely affect our business and future growth.

4. Our inability to implement our business strategy or effectively manage our growth could have an adverse effect on our business, results of operations and financial condition

Our company was incorporated on September 05, 2008 with Registrar of Companies, Kolkata, West Bengal. Initially, the company was engaged in the business was providing project finance services to companies through banks and financial institutions. In the year 2011 the company started providing services of capital market such as Direct listing of companies to BSE Limited. This new venture gave management an interest to explore more opportunities in capital market. So, in the year 2013 company applied for the license of merchant banking with Securities and Exchange Board of India (SEBI). SEBI has provided company with Initial Certificate of Registration which was valid for a period of 5 years. So, we have an operating history of just 6 years in the Merchant banking division. With our limited operating history, potential investors may not be able to analyze our past performances or future prospects. Further, we cannot assure you that our growth strategies will be successful or that we will be able to continue to expand our operations. In order to manage our growth effectively, we must implement, upgrade and improve our operational systems and procedures on a timely basis. If we fail to do so or if there are weaknesses in our existing procedures, we may not be able to meet our customers’ needs effectively or operate our business effectively. Moreover, our ability to sustain our rate of growth depends significantly upon our ability to select and retain key managerial personnel, maintaining effective risk management policies and training managerial personnel to address emerging challenges. We cannot assure you that our existing or future management, operational and financial systems, procedures and controls will be adequate to support future operations, or establish or develop business relationships beneficial to future operations. Failure to manage growth effectively could have an adverse effect on our business and results of operations.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

5. We continue to explore the diversification of our business and the implementation of new services. These diversifications and our other strategic initiatives may not be successful, which may adversely affect our business and results of operations.

In order to achieve our goal, we are constantly evaluating the possibilities of expanding our business through new models, innovations and/or starting new services. Although we believe that there are synergies between our current business and our expansion plans, we do have experience or expertise in these new areas. These new businesses and modes of delivery and the implementation of our strategic initiatives may pose significant challenges to our administrative, financial and operational resources, and additional risks, including some of which we are not aware of. The early stages and evolving nature of some of our businesses also make it difficult to predict competition and consumer demand therein. Our strategic initiatives require capital and other resources, as well as management attention, which could place a burden on our resources and abilities. In addition, we cannot assure you that we will be successful

in implementing any or all of our key strategic initiatives. If we are unable to successfully implement some or all of our key strategic initiatives in an effective and timely manner, or at all, our ability to maintain and improve our leading market position may be negatively impacted, which may have an adverse effect on our business and prospects, competitiveness, market position, brand name, financial condition and results of operations.

6. We face intense competition in our businesses, which may limit our growth and prospects. Our Company faces significant competition from other financial advisors.

We compete on the basis of a number of factors, including execution, depth of product and service offerings, innovation, reputation and price. Our competitors may have advantages over us, including, but not limited to:

- Substantially greater financial resources;
- Longer operating history than in certain of our businesses;
- Greater brand recognition among consumers;
- Larger customer bases in and outside India; or
- More diversified operations which allow profits from certain operations to support others with lower profitability. These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

7. We have not made any provisions for decline in value of our Investments.

Our company has made investment in equity shares of quoted and unquoted securities aggregating to ₹ 115.38 Lakhs and ₹ 367.67 Lakhs respectively as on March 31, 2021 as per Restated Consolidated Financial Statements. The market value of our quoted investments on a consolidated basis is ₹ 102.33 lakhs. Further we are not able to correctly access the value of our unquoted investments as there is no traded market for such shares.

We have not made any provision for the decline in value of our investments as we intend to hold such investments for long tenure and we believe we would be able to monetise such investments at above our book values in the future. Any reduction in value or our inability to monetise such investments on the future could materially adversely affect our results of operations and financial conditions.

8. Our Company has during the preceding one year from the date of this Prospectus have allotted Equity Shares at a price which is lower than the Issue Price.

In the last 12 months, we have made allotments of Equity Shares (Other than bonus issue) to our Promoter and the Selling Shareholder, which is lower than the Issue Price. The details of the same are mentioned below:

Name of the Allottees	No. of Equity Shares	Face Value (₹)	Issue Price (₹)	Reasons for allotment

For further details relating to date of allotment etc. please refer to section titled “Capital Structure” on page 53 of this Prospectus. The Issue Price is not indicative of the price that will prevail in the open market following listing of the Equity Shares.

9. Our Company is using a registered trademark which originally is owned by and registered in the name of our group company Gretex Industries Limited.

As on the date of this Prospectus the trademark currently used by our Company  is registered in the name of our group company Gretex Industries Limited. The said trademark is being used by the Company vide No Objection Certificate (“NOC”) dated May 10, 2021 granted by our group company Gretex Industries Limited on perpetual basis. Further, we cannot assure that said trademark being used by the Company will not be invalidated or circumvented. For further details, pertaining to our intellectual property, please refer to the chapter titled “Our Business” beginning on page 88 of this Prospectus.

10. Our inability to manage growth could disrupt our business and reduce our profitability. We propose to expand our business activities in coming financial years.

We expect our future growth to place significant demands on both our management and our resources. This will require us to continuously evolve and improve our operational, financial and internal controls across the organisation. In particular, continued expansion increases the challenges we face in:

- Our ability to acquire and retain clients for our services;
- Services, products or pricing policies introduced by our competitors;
- Capital expenditure and other costs relating to our operations;
- The timing and nature of, and expenses incurred in, our marketing efforts;
- Recruiting, training and retaining sufficient skilled technical and management personnel;
- Adhering to our high quality and process execution standards;
- Maintaining high levels of customer satisfaction;
- Developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems.

You should not rely on yearly comparisons of our results of operations as indicators of future performance. It is possible that in some future periods our results of operations may be below the expectations of public, market analysts and investors. If we are unable to manage our growth it could have an adverse effect on our business, results of operations and financial condition.

11. If we are unable to renew our existing leases or secure new leases for our existing or premises, or offices on commercially acceptable terms, or if we fail to comply with the terms and conditions of our leases resulting in termination of our leases, it could have a material adverse effect on our business, financial condition and results of operations.

The registered office that we are currently operating from is on leased/licensed basis. We typically enter into lease agreements for a period of 5 year for our offices. For details on the duration of existing leases for our delivery centres, see "Our Business" on page 88 of this Prospectus. In the event that if we fail to comply with the terms and conditions of our lease or that these existing leases are terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our operations. If alternative premises are not available at the same or similar costs, size or locations, our business, financial condition and results of operations may be adversely affected. In addition, any adverse development relating to the landlord's title or ownership rights to such properties may entail incurring significant legal expenses and adversely affect our operations, a significant interest penalty for any delays in payment of rent and fixed price escalation clauses that provide for a periodic increase in rent. If our sales do not increase in line with our rent and costs, our profitability and results of operations could be adversely affected.

12. In addition to normal remuneration, other benefits and reimbursement of expenses some of our Directors and Key Management Personnel may be interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Some of our Directors and Key Management Personnel may be interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

13. Our Company has a negative cash flow in its operating activities as well as investing activities in the past 3 years, details of which are given below. Sustained negative cash flow could impact our growth and business.

Our Company had negative cash flows from our operating activities as well as investing activities in the previous year(s) as per the Restated Consolidated Financial Statements and the same are summarized as under:

(₹ in lakhs)

Net Cash from Financing Activities	34.00	84.41	36.45
Net Increase/ (Decrease) in Cash & Cash Equivalents	9.70	3.46	10.87

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

14. Our group companies have incurred losses and are not profitable.

To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. An adjudication order in relation to an open offer assignment was passed against us and SEBI has imposed a penalty of Rs. 200,000/-. Any lapse in our operation in future may attract penalties which may have a impact on our financials.

18. Brand recognition is important to the success of our business, and our inability to build and maintain our brand names will harm our business, financial condition and results of operation.

Brand recognition is important to the success of our business. Establishing and maintaining our brand name in the industry or for people relying on services is critical to the success of the customer acquisition process of our business. Although, we expect to allocate significant number of resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brand names will be effective in attracting and growing user and client base for our businesses or that such effort will be cost-effective, which may negatively affect our business, financial condition and results of operations.

19. Our Company will not receive any proceeds from the Offer for Sale portion.

This Issue comprises of an offer for sale of 64,000 Equity Shares by our Promoter Selling Shareholder, M/s. Bonanza Agency LLP. The proceeds from the Offer pertaining to the above sale shares will be paid to the aforesaid company and our Company will not receive any proceeds from the Offer for sale portion. For further details, please refer the chapter titled “Objects of the Issue” on page 65 of this Prospectus.

20. Our company had appointed Mr. Arvind Harlalka as an executive director of our company and use to pay remuneration to him for his services.

As per companies act 2013 and rules made there under, managing director cannot be appointed as whole-time director in any other company apart from its wholly owned subsidiary. We had appointed Mr. Arvind Harlalka as an executive director of our company, during this time Mr. Arvind Harlalka was also managing our group company Gretex Industries Limited in the capacity of managing director. Since he was appointed as managing director in Gretex Industries Limited, his appointment as executive director in our company turns out to be void. During the term of his appointment, he was paid remuneration amounting to Rs. 26.70 lakhs as an executive director. After knowing about the non-compliance of relevant section of Companies act 2013, we changed designation of Mr. Arvind Harlalka to Non-executive director. This may subject him to action in the future which may affect profitability, reputation and business of the Company.

21. Significant security breaches in our computer systems and network infrastructure and fraud could adversely impact our business.

We seek to protect all the computer systems and network infrastructure in our offices from physical break-ins as well as security breaches and other disruptive problems. Our systems are potentially vulnerable to data security breaches, whether by our employees, or our service providers or others that may expose sensitive data to unauthorized persons. Computer break-ins and power disruptions could affect the security of information stored in and transmitted through these computer systems and networks.

Also, there was an instance where our servers were under ransom attack and due to which our data got lost and got corrupted. To address these issues and to minimise the risk of security breaches we employ security systems, including firewalls and intrusion detection systems, conduct periodic testing for identification and assessment of potential vulnerabilities. However, these systems may not guarantee prevention of frauds, break-ins, damage and failure. A significant failure in security measures could have an adverse effect on our business. Data security breaches could lead to the loss of intellectual property or could lead to the public exposure of personal information (including sensitive financial and personal information) of our clients, investors or our employees. Any such security breaches or compromises of technology systems could result in institution of legal proceedings against us and potential imposition of penalties, which may have an adverse effect on our business and reputation.

22. *The nature of our business exposes us to liability claims and contract disputes and our indemnities may not adequately protect us. Any liability in excess of our reserves or indemnities could result in additional costs, which would reduce our profits.*

Time is often of the essence in our business work. In the event there are delays in our current or future service, we will not be able to get extensions from our customers. Further, in some contracts, in case of delay due to deficiency in services by us, clients may have the right to complete the work at our risk and cost by engaging a third party. In the event we fail to perform under the terms of a particular contract, that could adversely affect our financial conditions and business operations. Failure to effectively cover ourselves against any of these reasons could expose us to substantial costs and potentially lead to material losses. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us.

23. *We have not entered into any long-term contracts with any of our customers and typically operate on the basis of work orders, which could adversely impact our revenue and profitability.*

We do not have any long-term contracts with our customers and we provide services on basis of regular work order with our customers which could adversely affect the business of our company. We cater our services on an order-to-order basis. Our customers can terminate their relationship with us by giving notice and as such terms and conditions as mutually agreed upon, which could materially and adversely impact our business. Although we believe that we have satisfactory business relation with our customers and have received business from them in the past and will regularly receive the business in future also but there is no certainty that we will receive business in future from them and may affect our profitability.

24. *Employee fraud or misconduct could harm us by impairing our ability to attract and retain clients and subject us to significant legal liability and reputational harm.*

Our business is exposed to the risk of employee misappropriation, fraud or misconduct. Our employees could make improper use or disclose confidential information, which could result in regulatory sanctions and serious reputational or financial harm. While we strive to monitor, detect and prevent fraud or misappropriation by our employees, through various internal control measures, we may be unable to adequately prevent or deter such activities in all cases. Our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. While we have not been able to identify such issues in the past, there could be instances of fraud and misconduct by our employees, which may go unnoticed for certain periods of time before corrective action is taken. In addition, we may be subject to regulatory or other proceedings, penalties or other actions in connection with any such unauthorized transaction, fraud or misappropriation by our agents or employees, which could adversely affect our goodwill, business prospects and future financial performance. We may also be required to make good any monetary loss to the affected party. Even when we identify instances of fraud and other misconduct and pursue legal recourse or file claims with our insurance carriers, we cannot assure you that we will recover any amounts lost through such fraud or other misconduct.

25. *Our company has incurred a loss in the F.Y 2019-2020.*

Our company had incurred a loss in the financial year 2019- 2020. We currently derive our entire operational revenues from providing financial services to our clients. We depend on a limited number of customers for a significant portion of our revenues. In the financial year 2019-2020 due to down fall in ability to generate business led to operational loss for our company, there is no assurance that our company would keep on generating profits year on years to come. There might be instances which may or may not be in control of the company due to which the company may incur losses in future.

26. *We have entered into related party transactions in the past and may continue to do so in the future.*

Our Company has entered into various transactions with our Promoters and associate companies. While we believe that all such transactions are conducted on arm's length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please see "Related Party Transactions" under the chapter "Consolidated Financial Statements as Restated" beginning on page 139 of this Prospectus.

27. *Our top 5 customers contribute major portion of our revenues for the period March 31, 2021. Any loss of business from one or more of them may adversely affect our revenues and profitability.*

Our top five and top ten customers contribute to a substantial portion of our revenues for the year ended March 31, 2021. The contribution of our top 5 and top 10 customers to our total revenue was 69.42% and 91.97% respectively for FY 2020-21. Any decline in our quality standards, growing competition and any change in the demand for our service by these customers may adversely affect our ability to retain them. We believe we have maintained good and long-term relationships with our customers. However, there can be no assurance that we will continue to have such long-term relationship with them, also any delay or default in payment by these customers may adversely affect our business, financial condition and results of operations. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

Due to COVID-19 pandemic, there may have been a temporary reduction in demand for our services and there may have been an overall slowdown in the industry. Further, such pandemic situations may also arise in the future and that could materially and adversely affect our business, financial condition and results of operations. Our growth has required and will continue to require increased investments in management personnel and systems, financial systems and controls, and office facilities. However, we cannot assure you that such investments will yield desired results and we may incur costs that we may not be able to recover. We may also be unable to hire additional qualified personnel to support the offering of a wider range of services. If we fail to manage our growth, we may experience operating inefficiencies, dissatisfaction among our client base, and lost revenue opportunities, which may adversely affect our business, results of operations and financial condition.

28. *Our Promoters and Promoter Group will continue to retain majority control over the Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval.*

Upon completion of the Issue, our Promoters and Promoter Group will own 73.48% of the Post-Issue Equity Share capital of the Company. As a result, the Promoters and Promoter Group will have the ability to exercise significant influence over all matters requiring shareholders' approval, including the election of directors and approval of significant corporate transactions. The Promoters and Promoter Group will also have an effective veto power with respect to any shareholder action or approval requiring a majority vote. Such concentration of ownership may also have the effect of delaying, preventing or deterring a change in control. For further details of Promoters' shareholding, please refer chapter titled "Capital Structure" beginning on page 53 of this Prospectus.

29. *The identification/ qualifying documents carry different name/spelling in case of one of our director, which may result in defamation of him resulting in the negative impact on our Company.*

Name of one of our non-executive independent director Mr. Gautam Gupta has been printed differently than his original name in PAN Card, which is a government identification proof. In PAN Card his name is written as Goutam Gupta whereas his original name is Gautam Gupta, which is correctly mentioned in identification/ qualifying documents except for PAN Card. This name difference may result in defamation of him resulting in negative impact on our Company.

30. *Our Company may have potential conflicts of interest with our Group Company(s) as they have been authorized and engaged in similar line of business.*

Our Promoters have interests in other companies and entities that may compete with us, including other Group Companies that may conduct businesses with operations that are similar to ours. Our Promoters have also promoted other companies and may continue to do so. For details please refer to the Chapter titled "Our Management", "Our Group Entities" and "Our Promoters and Promoter Group" on page nos. 111, 131 and 125 respectively of this Prospectus. Further, our Company has not entered into any non compete agreement with these companies and hence there can be no assurance of any conflict of interests which may arise in allocating or addressing business opportunities and strategies amongst our Company and our Group Company(s) in circumstances where our interests differ from theirs. In cases of conflict, our Promoter may favour other Companies in which our Promoter has an interest. Hence, conflict of interest may occur between our business and the businesses of our Group Companies which could have an adverse effect on our business, financial condition, results of operations and prospects

31. *We are dependent on a number of Key Managerial Personnel and our senior management, and the loss of, or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.*

Our performance depends largely on the efforts, expertise and abilities of our Key Managerial Personnel, senior management, and our operational personnel who possess significant experience in the industry in which we operate. We believe that the inputs and experience of our KMP and senior management, in particular, and other key personnel are valuable for the development of our business, operations and the strategic directions taken by our Company. We cannot assure you that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. Moreover, we may be required to substantially increase the number of our qualified personnel in connection with any future growth plans, and we may face difficulty in doing so due to the intense competition in the technology industry for such personnel. We may also be required to increase our levels of employee compensation more rapidly than in the past in order to remain competitive in retaining.

Further, the COVID -19 pandemic has dynamically altered the approach on workplace hygiene and safety and continuity of operations while confirming with measures implemented by the central and state governments in relation to the health and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID-19, it may potentially affect our operations. Further, in the event any of our employees' contract COVID-19, we may be required to quarantine our employees and shut down a part of or the entire operating facility as necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, loss of life, injuries and impact the well-being of our employees.

32. *Our financing requirements and the deployment of the net proceeds of the Issue are based on management estimates and have not been independently appraised.*

Our financing requirements and the deployment of the net proceeds of the Issue are based on management estimates and have not been appraised by any bank or financial institution. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and consequently our financing requirements and the expected deployment of the net proceeds of the Issue may also change.

33. *Delays or defaults in payments from our clients could result into a constraint on our cash flows. The efficiency and growth of our business depends on timely payments received from our clients.*

Our operations involve extending credit period based on the milestone of the services offered to our customers. Further, as stated in the Notes to the Restated Consolidated Financial Statements, the balance appearing under trade receivables are subject to confirmation by the respective parties. Consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. Accordingly, we had and may continue to have high levels of outstanding receivables. In case of any delay or default is made in payment by our Customers or if our management fails to accurately evaluate the credit worthiness of our customers, the same may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in case of increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

34. *Our insurance policies do not cover all risks, specifically risks like loss of profits, terrorism, etc. In the event of occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss.*

Our company has obtained insurance coverage in respect of certain risks. Our significant accounting policies consists of, amongst others, standard fire and special perils, earthquakes, etc. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks like loss of profits, terrorism, etc. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial conditions and results of operations may be materially and adversely affected.

- 35. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.***

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “*Objects of the Issue*” on page 65 of this Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

- 36. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholder’s investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 138 of this Prospectus.

- 37. *There were instances such as ransom attack on our system and lost of documents during shifting our registered office within the city limits. There may be such instances in future due to which there can be loss of data and such loss of data could result in negative impact on our company.***

In the year 2019, our Company’s registered office was shifted from Room no.102, 1st Floor, Kanakia Atrium-2 Chalaka Andheri - Kurla Road Andheri East, Mumbai – 400 093 Maharashtra to Office No. 13, 1st Floor, Bansilal Mansion, 9-15 Homi Modi Street, Fort Mumbai – 400 001, Maharashtra. During shifting some of our documents got lost and misplaced, we had file an FIR for the lost of documents at Rambai Ambedkar Marg Police Station, Fort Mumbai but we could not track the lost documents. Any occurrence of such incident in future result in loss of information which may have an adverse effect on our business and reputation.

- 38. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.***

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships or joint venture across the country and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and negotiating with several potential partners, we have not entered into any definitive agreements. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and marketing functions and the diversion of management’s time and focus from operating our business to addressing challenges pertaining to acquisition and integration. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realize the anticipated benefits of these acquisitions or investments cause us to incur unanticipated liabilities, and harm our business generally.

- 39. *Our financing agreements contain covenants that limit our flexibility in operating our business. Our inability to meet our obligations, including financial and other covenants under our debt financing arrangements could adversely affect our business, results of operations and financial condition.***

As of March 31, 2021, our total outstanding indebtedness was ₹ 250.30 lakhs (including current maturities of our long term debt). Our company has taken secured loans from financial institution by creating a charge over our immovable properties in respect of loans/facilities availed by us. In the event we default in repayment of the loans/facilities availed

by us and any interest thereof, our properties may be forfeited by lenders, which in turn could have significant adverse effect on our business, financial condition and results of operations.

Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated by our businesses. Further, our financing agreements contain certain restrictive covenants that limit our ability to undertake certain types of transactions, any of which could adversely affect our business and financial condition. Further, in the event that we fail to meet our debt servicing obligations under our financing documents, the relevant lender(s) could declare us to be in default, accelerate the maturity of our obligations or even sell our Company's movable and immovable assets. We cannot assure investors that in the event of any such acceleration we will have sufficient resources to repay these borrowings. Failure to meet obligations under debt financing agreements may have an adverse effect on our cash flows, business and results of operations. Our ability to meet our debt service obligations and to repay our outstanding borrowings will depend primarily upon the cash flows generated by our business. We cannot assure you that we will generate sufficient cash to enable us to service existing or proposed borrowings. Incurring significant indebtedness may limit our flexibility in planning for or reacting to changes in our business & industry and limit our ability to borrow additional funds. Further, our level of indebtedness has important consequences to our Company, such as:

- Increasing our vulnerability to general adverse economic, industry and competitive conditions;
- Limiting our flexibility in planning for, or reacting to, changes in our business and the industry; affecting our credit rating;
- Limiting our ability to borrow more money both now and in the future.

If any of these risks were to materialize, our business and results of operations may be adversely affected. For further detail please refer to chapter titled "*Consolidated Financial Statements as Restated*" beginning on page 139 and financial indebtedness in chapter titled "*Financial Indebtedness*" on page 176 of this Prospectus.

40. *There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all.*

In accordance with Indian law and practice, permission to list the Equity Shares will not be granted until after the Equity Shares have been issued and allotted. Approval will require all other relevant documents authorizing the issuing of our Equity Shares to be submitted. There could be a failure or delay in listing our Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

41. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of Our Company.*

Since, the Issue size is less than ₹ 10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised from this Issue, is hence, at the discretion of the management and the Board of Directors of Our Company and Our Company's management will have flexibility in applying the proceeds of the Issue and will not be subject to monitoring by any independent agency. The fund requirement and deployment mentioned in the Objects of the Issue is based on internal management estimates and have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. However, our Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. Also, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Issue without the Company being authorized to do so by our shareholders by way of special resolution and other compliances as applicable in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

42. *Negative publicity could adversely affect our revenue model and profitability.*

We work in the market where trust of the customers on us and upon the services provided by us matters a lot. Any negative publicity regarding our company or the services rendered by the company due to any other unforeseen events may affect our reputation and image which leads to the adverse effect on our business and goodwill as well.

43. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past.

We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

Issue Specific Risks:

44. There are restrictions on daily/weekly/monthly movements in the price of the Equity Shares, which may adversely affect a shareholders' ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

45. After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- a) Volatility in the Indian and global capital market;
- b) Company's results of operations and financial performance;
- c) Performance of Company's competitors,
- d) Adverse media reports on Company or pertaining to the agriculture Industry;
- e) Changes in our estimates of performance or recommendations by financial analysts;
- f) Significant developments in India's economic and fiscal policies; and
- g) Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

46. You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

47. The Issue price of our Equity Shares may not be indicative of the market price of our Equity shares after the issue.

The Issue price of our equity Shares has been determined by fixed price method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuation after the issue and may decline below the issue price. We

cannot assure you that you will be able to sell your Equity Shares at or above the Issue price. For further details you may refer chapter titled “*Basis for Issue Price*” beginning on the page 70 of this prospectus.

Some of the factors which may affect our share price without limitations are as follows:

- Reports on research by analysts.
- Changes in revenue.
- Variations in growth rate of our financial indicators such as earning per share, income, profit etc.
- General Market Condition
- Domestic and International Economy.

48. Sale of Equity Shares by our Promoters may adversely affect the Trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISKS

49. The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted.

The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted. In late calendar 2019, COVID-19, commonly known as “novel corona virus” was first reported in Wuhan, China. Since then, the virus has progressively spread globally too many countries. The World Health Organization declared the COVID-19 outbreak as a health emergency of international concern on January 30, 2020 and thereafter categorised the outbreak as a pandemic on March 11, 2020. In order to contain the spread of COVID-19 virus, the Government of India initially announced a 21-day lockdown on March 24, 2020, which, after being subject to successive extensions, is being relaxed currently. During the duration of the lockdown, there were several restrictions in place including travel restrictions and directive to all citizens to not move out of their respective houses unless essential. Whilst the lockdown required private, commercial and industrial establishments to remain closed, manufacturing units of essential commodities were permitted to be functional. The team members have been working from home during lockdown and have been able to execute their responsibilities and service clients without any disruption, difficulty or delay. Due to the rising number of infected cases of COVID-19 in the country, there is no certainty if additional restrictions will be put back in place or if another lockdown would be re-imposed to control the spread of the pandemic. We cannot assure you that we may not face any difficulty in our operations due to such restrictions and such a prolonged instance of lockdown may adversely affect our business, financial condition and results of operations. Further, our ability to ensure the safety of our workforce and continuity of operations while confirming with measures implemented by the central and state governments in relation to the health and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID-19, it may potentially affect our operations. Further, in the event any of our employees contract COVID-19, we may be required to quarantine our employees and shut down a part of or the entire operating facility as necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, loss of life, injuries and impact the wellbeing of our employees. The ultimate impact will depend on a number of factors, many of which are outside our control. These factors include the duration, severity and scope of the pandemic, the impact of the pandemic on economic activity in India and globally, the eventual level of infections in India, and the impact of any actions taken by governmental bodies or health organisations (whether mandatory or advisory) to combat the spread of the virus. These risks could have an adverse effect on our business, results of operations, cash flows and financial condition. To the extent that the COVID19 pandemic adversely affects our business and operations, it may also have the effect of heightening many of the other risks described in this “*Risk Factors*” section.

50. General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

Our business is highly dependent on economic and market conditions in India and other jurisdictions where we operate. General economic and political conditions in India, such as macroeconomic and monetary policies, industry-specific trends, mergers and acquisitions activity, legislation and regulations relating to the financial and securities industries, household savings rate, investment in alternative financial instruments, upward and downward trends in the market, business and financial sectors, volatility in security prices, perceived lack of attractiveness of the Indian capital markets, inflation, foreign direct investment, consumer confidence, currency and interest rate fluctuations, availability

of short-term and long-term market funding sources and cost of funding, could affect our business. Global economic and political conditions may also adversely affect the Indian economic conditions. Market conditions may change rapidly and the Indian capital markets have experienced significant volatility in the past. The Indian economy has had sustained periods of high inflation in the recent past. If inflation or real interest rates were to rise significantly, the trends towards increased financial savings might slow down or reverse our employee costs may increase and the sales of many of our products and services may decline.

51. Downturns or disruptions in the financial and capital markets could reduce transaction volumes, and could cause a decline in the business and impact our profitability.

As a financial advisory and merchant banking company, our business is materially affected by conditions in the domestic and global financial and capital markets and economic conditions in India and throughout the world. Our operational revenues are derived from fees from advisory services, consultancy income and issue management across the equity capital market. Our revenue, scale of operations and, consequently, our profitability are largely dependent on favourable market conditions and political environment, investor sentiment, price levels of equity shares and other securities as well as other factors that affect the financial and capital markets in India and abroad. Capital markets are exposed to additional risks, including liquidity, interest rate and foreign exchange related risks. Any downturn or disruption in the markets specifically would have a material adverse effect on our results of operations. Even in the absence of a market downturn, we are exposed to substantial risk of loss due to market volatility. A market downturn would likely lead to a decline in the volume of transactions that we execute for our customers as well as a decrease in prices. Any decline in transactions would lead to a decline in our revenues received from fees.

Industry Related Risks:

52. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

53. Malpractices by some players in the industry affect overall performance of emerging Companies

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like our as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

Other Risks:

54. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India. Any gain on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain on the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October 2004 shall be available only if the acquisition of share is

chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1st day of October 2004 on which STT was not charged will attract tax under provisions of Long Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April 2018 if the long-term capital gains exceeds ₹ 1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April 2018 in excess of ₹ 1,00,000/- pa. shall be chargeable at the rate of 10%. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

55. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements, prepared and presented in accordance with SEBI ICDR Regulations contained in this Prospectus.

As stated in the reports of the Auditor included in this Prospectus under chapter “*Consolidated Financial Statements as Restated*” beginning on page 139 of this Prospectus. The financial statements included in this Prospectus are based on financial information that is based on the audited Consolidated financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Prospectus. Accordingly, the degree to which the financial information included in this Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Prospectus should accordingly be limited.

56. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

57. Financial instability in Indian Financial Markets could adversely affect our Company's results of operation and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

58. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in this Prospectus.*

While facts and other statistics in this Prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Our Industry*” beginning on page 75 of this Prospectus. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

59. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

60. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

61. *The extent and reliability of Indian infrastructure could adversely affect our Company’s results of Operations and financial condition.*

India’s physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company’s normal business activity. Any deterioration of India’s physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company’s business operations, which could have an adverse effect on its results of operations and financial condition.

62. *Natural calamities could have a negative impact on the Indian economy and cause Our Company’s business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

63. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely

affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

64. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

Particulars	Detail
Trade Receivables	Our operations involve extending credit period based on the milestone of the services offered to our customers. We have assumed trade receivables credit period of 120 days in the financial year 2021-22 which is less than the credit period of financial year 2020-21 as we expect to realise our receivables in the same manner as done previously to grow our operations.

SECTION VI: ABOUT THE ISSUER

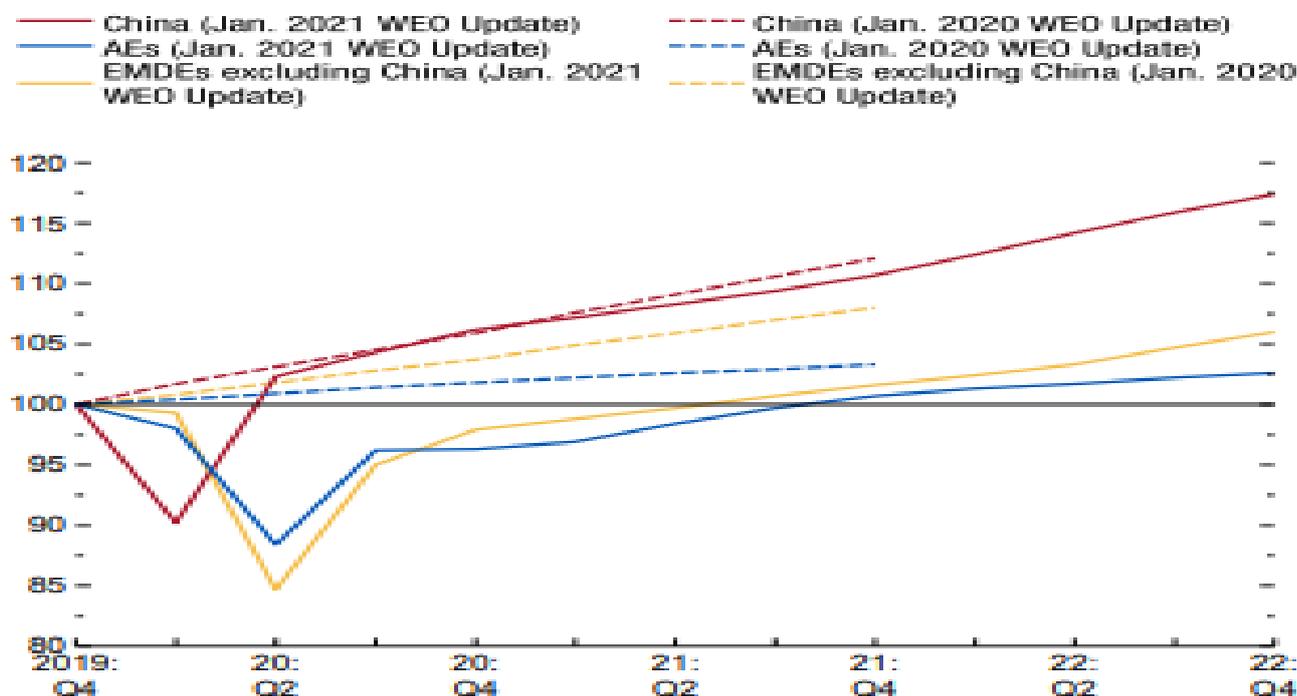

OUR INDUSTRY

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

GOLBAL ECONOMY AT LARGE

The projected growth recovery this year follows a severe collapse in 2020 that has had acute adverse impacts on women, youth, the poor, the informally employed, and those who work in contact-intensive sectors. The global growth contraction for 2020 is estimated at -3.5 percent, 0.9 percentage point higher than projected in the previous forecast (reflecting stronger-than-expected momentum in the second half of 2020). Although recent vaccine approvals have raised hopes of a turnaround in the pandemic later this year, renewed waves and new variants of the virus pose concerns for the outlook. Amid exceptional uncertainty, the global economy is projected to grow 5.5 percent in 2021 and 4.2 percent in 2022. The 2021 forecast is revised up 0.3 percentage point relative to the previous forecast, reflecting expectations of a vaccine-powered strengthening of activity later in the year and additional policy support in a few large economies. Policy actions should ensure effective support until the recovery is firmly underway, with an emphasis on advancing key imperatives of raising potential output, ensuring participatory growth that benefits all, and accelerating the transition to lower carbon dependence. As noted in the October 2020 World Economic Outlook (WEO), a green investment push coupled with initially moderate but steadily rising carbon prices would yield needed emissions reductions while supporting the recovery from the pandemic recession. Strong multilateral cooperation is required to bring the pandemic under control everywhere. Such efforts include bolstering funding for the COVAX facility to accelerate access to vaccines for all countries, ensuring universal distribution of vaccines, and facilitating access to therapeutics at affordable prices for all. Many countries, particularly low-income developing economies, entered the crisis with high debt that is set to rise further during the pandemic. The global community will need to continue working closely to ensure adequate access to international liquidity for these countries. Where sovereign debt is unsustainable, eligible countries should work with creditors to restructure their debt under the Common Framework agreed by the G20. A stronger starting point for the 2021–22 forecast. Multiple vaccine approvals and the launch of vaccination in some countries in December have raised hopes of an eventual end to the pandemic. Moreover, economic data released after the October 2020 WEO forecast suggest stronger-than-projected momentum on average across regions in the second half of 2020. Despite the high and rising human toll of the pandemic, economic activity appears to be adapting to subdued contact-intensive activity with the passage of time. Finally, additional policy measures announced at the end of 2020—notably in the United States and Japan—are expected to provide further support in 2021–22 to the global economy. These developments indicate a stronger starting point for the 2021–22 global outlook than envisaged in the previous forecast. Lingering concerns. However, surging infections in late 2020 (including from new variants of the virus), renewed lockdowns, logistical problems with vaccine distribution, and uncertainty about take-up are important counterpoints to the favorable news. Much remains to be done on the health and economic policy fronts to limit persistent damage from the severe contraction of 2020 and ensure a sustained recovery. These developments raise three interrelated questions for the global outlook. First, how will restrictions needed to curb transmission affect activity in the near term before vaccines begin delivering effective society-wide protection? Second, how will vaccine-rollout expectations and policy support affect activity? Third, how will financial conditions and commodity prices evolve? The baseline forecast requires forming a view on these unknowns. The strength of the recovery is projected to vary significantly across countries, depending on access to medical interventions, effectiveness of policy support, exposure to cross-country spillover, and structural characteristics entering the crisis (Figure 1).

(Index, 2019:Q4 = 100)

Source: IMF staff estimates.

Note: AEs = advanced economies; EMDEs = emerging market and developing economies; WEO = World Economic Outlook.

Infections and restrictions will soften momentum in early 2021. Third quarter GDP outturns mostly surprised on the upside (Australia, euro area, India, Japan, Korea, New Zealand, Turkey, United States) or were in line with expectations elsewhere (China, Mexico). Among components, private consumption rebounded the most. Investment picked up relatively slowly, except in China (Figure 2). The expenditure decompositions suggest a release of pent-up demand and adjustments to telework. Given the largely one-off nature of such spending, it is likely to dissipate once the adjustments are made. High-frequency data suggest some tapering into the fourth quarter of 2020—for example, in new orders, industrial production, and global trade (Figure 3). The US December employment report also showed the first net decline in nonfarm payrolls since April 2020. Moreover, services output remains subdued and is likely to soften further in the coming months with renewed restrictions to combat rising infections. The softening in early 2021 is expected to give way to rising momentum in the second quarter as vaccines and therapies become more readily available, allowing contact-intensive activity to strengthen. Vaccines, therapies and containment efforts. The baseline assumes broad vaccine availability in advanced economies and some emerging market economies in summer 2021 and across most countries by the second half of 2022— an accelerated timeline relative to expectations at the time of the previous forecast. Vaccine rollout speed is assumed to vary across economies based on country-specific factors. Moreover, therapies are expected to gradually become more effective and more accessible worldwide over the course of 2021–22. The baseline also assumes the possibility of lockdowns, including to contain transmission of new variants, before vaccines become widely available. Additional fiscal policy support set to boost activity in some countries, but most are expected to experience lower deficits in 2021. The sizable fiscal support announced for 2021 in some countries, including most recently in the United States and Japan, together with the unlocking of Next Generation EU funds, will help lift economic activity among advanced economies with favourable spill overs to trading partners. However, as noted in the January 2021 Fiscal Monitor Update, fiscal deficits in most countries are projected to decline in 2021 as revenues rise and expenditures decline automatically with the recovery. Supportive financial conditions. Major central banks are assumed to maintain their current policy rate settings throughout the forecast horizon to the end of 2022. As a result, financial conditions are expected to remain broadly at current levels for advanced economies while gradually improving for emerging market and developing economies. Within this latter group, differentiation between investment-grade sovereigns (who have been able to issue external debt in large amounts in 2020) and high-yield borrowers (many of whom are constrained in their ability to take on additional debt and until recently have not accessed international markets during the pandemic) is expected to subside as the recovery takes hold. As noted in the January

2021 Global Financial Stability Report Update, markets remain upbeat about prospects for 2021, banking on continued policy support. Rising commodity prices. Reflecting the projected global recovery, oil prices are expected to rise in 2021 just over 20 percent from the low base for 2020, but will still remain well below their average for 2019. Non-oil commodity prices are also expected to increase with those of metals, in particular, projected to accelerate strongly in 2021.

Global growth. After an estimated 3.5 percent contraction in 2020, the global economy is projected to grow 5.5 percent in 2021 and 4.2 percent in 2022 (Table 1). The estimate for 2020 is 0.9 percentage point higher than projected in the October WEO forecast. This reflects the stronger than-expected recovery on average across regions in the second half of the year. The 2021 growth forecast is revised up 0.3 percentage point, reflecting additional policy support in a few large economies and expectations of a vaccine-powered strengthening of activity later in the year, which outweigh the drag on near-term momentum due to rising infections. The upgrade is particularly large for the advanced economy group, reflecting additional fiscal support—mostly in the United States and Japan—together with expectations of earlier widespread vaccine availability compared to the emerging market and developing economy group. Global trade. Consistent with recovery in global activity, global trade volumes are forecast to grow about 8 percent in 2021, before moderating to 6 percent in 2022. Services trade is expected to recover more slowly than merchandise volumes, however, which is consistent with subdued cross-border tourism and business travel until transmission declines everywhere. Global activity will remain well below the pre-COVID, January 2020 WEO projections through the forecast horizon (Figure 4). The strength of the projected recovery varies across countries, depending on the severity of the health crisis, the extent of domestic disruptions to activity (related to the structure of the economy and its reliance on contact-intensive sectors), the exposure to cross-border spill overs, and—importantly—the effectiveness of policy support to limit persistent damage. Advanced economies, in general, have been able to provide expansive fiscal support to households and firms (direct tax and spending measures as well as equity injections, loans, and guarantees), and central banks have reinforced this with expanded asset purchase programs, funding-for-lending facilities, and, for some, interest rate cuts. Reflecting the strong policy support and the anticipated widespread availability of vaccines in summer 2021, the projected output loss compared with the pre-COVID forecast is relatively smaller for advanced economies than other countries. Recovery paths vary within the group, with the US and Japan projected to regain end-2019 activity levels in the second half of 2021, while in the euro area and the United Kingdom activity is expected to remain below end-2019 levels into 2022. The wide divergence reflects to an important extent differences across countries in behavioural and public health responses to infections, flexibility and adaptability of economic activity to low mobility, pre-existing trends, and structural rigidities entering the crisis. The 2021 forecast for the United States is revised up 2 percentage points relative to the October 2020 WEO projection, reflecting carryover from the strong momentum in the second half of 2020 and additional support from the December 2020 fiscal package. Similarly, the 0.8 percentage point upward revision to Japan’s 2021 forecast is largely because of the additional boost from the fiscal measures introduced at the end of 2020. These upgrades are partially offset by downward revisions to the 2021 forecast for the euro area reflecting an observed softening of activity toward the end of 2020, which is anticipated to continue into early 2021 amid rising infections and renewed lockdowns. Emerging market and developing economies are also projected to trace diverging recovery paths. Considerable differentiation is expected between China—where effective containment measures, a forceful public investment response, and central bank liquidity support have facilitated a strong recovery—and other economies. Oil exporters and tourism-based economies within the group face particularly difficult prospects considering the expected slow normalization of cross-border travel and the subdued outlook for oil prices. As noted in the October 2020 WEO, the pandemic is expected to reverse the progress made in poverty reduction across the past two decades. Close to 90 million people are likely to fall below the extreme poverty threshold during 2020–21. Across regions, vulnerabilities, economic structure, and pre-crisis growth trends, together with the severity of the pandemic and the size of the policy response to combat the fallout, shape recovery profiles. Notable revisions to the forecast include the one for India (2.7 percentage points for 2021), reflecting carryover from a stronger-than-expected recovery in 2020 after lockdowns were eased.

Government Initiatives

The first Union Budget of the third decade of 21st century was presented by Minister for Finance & Corporate Affairs, Ms. Nirmala Sitharaman in the Parliament on February 1, 2020. The budget aimed at energising the Indian economy through a combination of short-term, medium-term and long-term measures. In the Union Budget 2021-22, capital expenditure for FY22 is likely to increase to increase by 34.5% at Rs. 5.5 lakh crore (US\$ 75.81 billion) over FY21 (BE) to boost the economy. Increased government expenditure is expected to attract private investments, with production-linked incentive scheme providing excellent opportunities. Consistently proactive, graded and measured policy support is anticipated to boost the Indian economy. In March 2021, the Ministry of Electronics and IT (MeitY) invited applications for the second round of large-scale electronics manufacturing under the production-linked incentive (PLI) scheme. The window to apply for the scheme has been opened until March 31, 2021, which could be further extended in accordance with guidelines issued by the MeitY. In March 2021, following the announcement of incentive schemes for mobile and IT hardware manufacturing, the government announced to consider a key scheme for establishing display fabrication units in India. Numerous foreign companies are setting up their facilities in India on account of various Government initiatives like Make in India and Digital India. Mr. Narendra Modi, Prime Minister of India, launched Make in India initiative with an aim to boost country's manufacturing sector and increase purchasing power of an average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25% of the GDP from the current 17%. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

Some of the recent initiatives and developments undertaken by the Government are listed below:

The January 2021 WEO update forecast a 11.5% increase in FY22 and a 6.8% rise in FY23. According to the IMF, in the next two years, India is also expected to emerge as the fastest-growing economy. India is focusing on renewable sources to generate energy. It is planning to achieve 40% of its energy from non-fossil sources by 2030, which is currently 30% and have plans to increase its renewable energy capacity from to 175-gigawatt (GW) by 2022. India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report. It is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by 2040 as per a report by PricewaterhouseCoopers.

The sector comprises commercial banks, insurance companies, non-banking financial companies, co-operatives, pension funds, mutual funds and other smaller financial entities. The banking regulator has allowed new entities such as payment banks to be created recently, thereby adding to the type of entities operating in the sector. However, financial sector in India is predominantly a banking sector with commercial banks accounting for more than 64% of the total assets held by the financial system.

The Government of India has introduced several reforms to liberalise, regulate and enhance this industry. The Government and Reserve Bank of India (RBI) have taken various measures to facilitate easy access to finance for Micro, Small and Medium Enterprises (MSMEs). These measures include launching Credit Guarantee Fund Scheme for MSMEs, issuing guideline to banks regarding collateral requirements and setting up a Micro Units Development and Refinance Agency (MUDRA). With a combined push by Government and private sector, India is undoubtedly one of the world's most vibrant capital markets.

We are a Company in India, offering diversified financial and consultancy services in the areas of Capital Markets, Corporate Finance, Corporate Restructuring, Debt Syndication, Compliance Advisory. We started our operations in the year 2008, in the initial years the company was engaged in the business of providing project finance services to companies through banks and financial institutions. In the year 2011 the company started providing services of capital market such as Direct listing of companies on nationwide stock exchanges. This new venture gave management an interest to explore more opportunities in capital market. So, in the year 2013 we applied for the license of merchant banking with Securities and Exchange Board of India (SEBI). SEBI has provided the company with Initial Certificate of Registration which was valid for a period of 5 years. In the year 2019 our initial certificate of registration was renewed and a permanent registration was provided by SEBI. Since past six years we have been carrying out the business of management of fund-raising activities, investment advisory, underwriting of issues, manager, consultant or adviser to any issue including corporate advisory services and as consultant or adviser to the issuer. We are registered as SEBI Category-I Merchant Banker having Registration Code INM000012177. Since inception, we have aimed to become a one-stop shop for providing financial advisory services. From its budding time, our goal is to share out of box and innovative ideas and execute them efficiently. Traditionally the only way of finance was through debt or personal finance but debt funding often restricts the real growth of a company and it is seen that a company can achieve great heights when it goes public. The company attains the growth when it unlocks the real value of company through valuing the shares of the company. Over the time we have developed an expertise in the area of identifying Small and Medium Enterprises, determine its funding requirement and carter company’s funds needs by taking the company public by the mean of an IPO on the SME Exchange in India. We primarily cater the needs of Small and Medium Enterprises, but our services are not limited to SMEs, over the period of years our company has been able to successfully create its name in Primary markets for successfully executing 21 SME IPOs and 1 Startups Segment under SME Platform of BSE Limited. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI payment mechanism.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The responsibility of granting approval for foreign investment under the Consolidated FDI Policy and FEMA has been entrusted to the concerned ministries/departments

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry (formerly Department of Industrial Policy and Promotion), Government of India (“DPIIT”) issued the Consolidated FDI Policy, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. Up to 100% foreign investment under the automatic route is currently permitted in the sector of “Manufacturing”, which includes manufacture of cement and concrete products.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that: (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations, (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy, and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Each Applicant should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, such Equity Shares are being offered and sold (i) outside of the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur; and (ii) to “qualified institutional buyers” (as defined in Rule 144A under the U.S. Securities Act), pursuant to the private placement exemption set out in Section 4(a) of the U.S. Securities Act.
